

Reliable, Relevant, Flexible, Successful

CHILDREN'S CARE, LEARNING AND DEVELOPMENT LEVEL 3 DIPLOMA

At SNC Training, we understand the importance of having skilled, professional and fully qualified staff.

This programme will support individuals to develop the essential knowledge and skills required for promoting the development of children and enable them to achieve their full potential, as well as providing qualified practitioner status (for the 0-8yr age group).

Developed in line with National Occupational Standards, this programme introduces new units that reflect the importance of supporting teaching and learning and recognises the essential support work that is carried out to help children achieve their potential. It identifies the broad range of support work carried out children's care, learning and development.

What can we offer you?

We add value with tailored training solutions that deliver measurable improvements to business performance, at a time and place that is best for you. Our range of services includes:

- Skills health check for your organisation and workforce
- Skills planning that support the achievement of business objectives
- Personalised individual employee development programmes
- Supporting individuals in their continuous professional development

How can this programme benefit my business?

- Improve workforce motivation
- Improve staff retention
- Improve performance
- Address skills gaps
- Comply with relevant legislation

Who is this programme suitable for?

This course is ideal for those in settings or services whose main purpose is children's care, learning or development. It is likely that the role will involve carrying out a broad range of support and assistance activities. It provides an opportunity to develop the skills and knowledge to provide support at an advanced level, in a self-directed way. The development or enhancement of knowledge and skills will be provided as part of this programme to meet the needs of the individual within their job role.

Programme Overview

This programme will enable the development of an advanced working knowledge and understanding of how to promote the development of children and enable them to achieve their full potential. Content includes the legislative guidelines and policies relating to childcare and how to implement these in practice as well as gaining numeracy and literacy functional skills to support work with children.

Assessment is via a portfolio of evidence and practical observation in the workplace.

What does the programme involve?

Individuals must complete the following mandatory units:

- Promoting children's development
- Safeguarding children
- Promoting children's rights
- Children's learning activities and play
- Reflecting on and developing practice for children
- Supporting children's numeracy skills
- Supporting children's literacy skills.

Programme duration:

Approximately 6-8 months to complete the programme dependant on individual circumstances.

Programme cost:

Funding may be available.

Further opportunities are available to develop knowledge and skills to support individual Continuous Professional Development.
