

Reliable, Relevant, Flexible, Successful

LABORATORY TECHNICIAN APPRENTICESHIP

An Apprenticeship enables an individual to learn, work and earn, and become qualified at the same time. It is a nationally recognised framework designed with the help of employers in the industry and the sector skills council.

This apprenticeship framework is for anyone interested in working in a laboratory setting, often in the engineering manufacture and education sectors. The framework is based upon a combination of qualification outcomes which together provide the knowledge, understanding and skills required for an individual working as a laboratory technician.

How can this Apprenticeship benefit my business?

- Increase productivity
- Increase motivation
- Improve workforce retention
- Address skills gaps
